## OPERATIONS

Little Spark Films (LSF) is a tightly knit production company that handles production from conception to completion. LSF is equipped with various RED Cameras that shoot in a cinematic resolution. An elite editing bay capable of handling footage beyond 8k. And a grip truck loaded with tools for most production needs. The team is also available for most post-production needs. Most productions in house are directed by co-founder Joe Manco. Shot by DP Jörg Viktor and produced by Catalina Querida. Unless hired by a 3rdparty source to operate under another director / producer.

Our Audio engineering department consists of a full studio suit based out of Arlington, TX. This portion of the team is fully capable of handling all audio design needs from foley, score & ambient to final audio mix and master of the project. As well as legal experience navigating through BMI & ASCAP when it comes to acquiring commercial music rights.
